SEBOSTATIC CREAM FOR ACNE-PRONE SKIN, DR. IRENA ERIS

I initially thought a cream might make my T-zone too oily, but was pleasantly surprised to find that this cream feels more like a lotion, with a light texture that penetrates pores with azelaic acid and sodium salicylate. It feels cool and soothing, with a refreshing cucumber scent. Best of all, unlike some acne formulas I've found harsh or drying, this cream leaves my skin soft and hydrated.

PURIFYING CREAM CLEANSER FOR NORMAL & DRY SKIN, PLANTOGEN

I love this gentle cleanser's richly creamy texture, which feels smooth and comforting. It rinses cleanly, so my face feels hydrated and soft, but fresh—even my T-zone doesn't feel oily. I also like its light, soothing botanical fragrance and natural ingredients, including chamomile extract, vitamin E and manuka honey.
